Office Action Summary	Application No. 10/690,395	Applicant(s) LODWIG ET AL.	
	Examiner Stephen R. Funk	Art Unit 2854	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2854

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 46 - 48, 50, 52, and 53 are rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi (JP 2002-120446). Takahashi teaches a method of cleaning substrates comprising moving to a print station (3, 7) a succession of substrates (8), moving a consumable transfer medium (13) through the print station, assisting cleaning of the substrates with a cleaning structure (17) whose useful life is related to the useful life of the consumable transfer medium (see paragraph 11), unalterably linking the replacement of the consumable transfer medium with the replacement of the cleaning structure (see paragraphs 11, 23, 31, 35, 36).

With respect to claim 47 the consumable transfer medium (13) of Takahashi is a transfer ribbon.

With respect to claims 48, 50, and 52 the cleaning structure (17) of Takahashi is a sticky roller directly engaging the substrates (8). See again paragraphs 11, 23, 31, 35, and 36 of Takahashi, for example.

With respect to claim 53 note the cartridge (16) of Takahashi.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2854

Claims 49 and 51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takahashi in view of Meier et al. ('229). Takahashi does not teach the cleaning structure being a belt or web or the cleaning structure engaging a primary cleaning member. Meier et al. teach a sticky belt (64) engaging a primary cleaning member (30). See paragraphs 19, 22, 25, and 26 of Meier et al., for example. It would have been obvious to one of ordinary skill in the art to provide the method of Takahashi with the step of engaging a sticky belt to a primary cleaning member in view of Meier et al. so as to increase the sticky surface area for retaining debris while still exposing a clean primary cleaning member to the substrates.

Applicant's arguments with respect to claim 46 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with a *certification statement* prompted the new ground(s) of rejection presented in this Office action. However, according to MPEP § 609(B)(2)(a)(i) this office action cannot be made final.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen R. Funk whose telephone number is (571) 272-2164.
